Product Information for surface water applications

## OTT Z400: New advanced signal counter set for current meter measurements

### Flexible

Multiple measurement modes are available as standard features: Impulse, time, integration measurement and integration with remaining term measurement.

### Display well readable

LC display with readable figures makes it easy to read the measurement result.

### “Low battery” indicator

Battery indication for low power alert.

### Rugged & durable

Rugged water resistant housing with IP 65 rating.

### Variant for velocity computation

Flow velocity computation based on user-defined equations. The input of the velocity equations is made via PC.

## Your OTT Z400 for current meter measurements

- Signal counter set for all conventional hydrological current meters
- Reliable and robust instrument for the daily measurement work
- Variant with flow velocity computation and display of actual measured flow velocity
